

ESP-M2 is used for its tiny footprint

USB + power source switching

R15: 10k for 160V, 7.5k for 165V (recommended!), 2.2k for 170V, 1k for 175V

When using ULN2003, set to 160V to properly turn off the tubes

T4: TTRN-060S-013

T3/T4 is a dual footprint, so pick only one. Only the smaller CEEH54 fits in the original enclosure
